## School Bus Tracking
GPS and RFID Solution

- Facilitate remote tracking of current bus location on app.

- Ensure tracking of students in & out of bus

- Notify parents via SMS/App notification for pickup, drop-off, bus delay, ETAs

- Admin can track complete fleet on single screen, check bus location, generate reports on demand, and automate routing, planning & scheduling bus stoppages.

Attendance Management
RFID Solution

- Automate attendance recording.

- Alert/notify school authorities in case of student entering restricted area or stay in school after scheduled time.

- Parents will be notified in case their ward is out of school before scheduled time.

Communication
Closed Group Communication

- Notice Board - Communication to all students regarding school activities and events.

- Messaging between teacher & parents.

- Group messages (one-to-many Interaction) – controlled communication between mentors to different groups.

- Home work sharing

- Attendance

School ERP Solution
Efficient & Smarter Schools

Simple yet powerful tool connects various departments within the school like admin, finance, etc. The solution aims to simplify and manage the following important tasks:

- Admission Management
- Course Management
- Student Information System
- Fee Management
- Exam/Result Management
- Attendance Management
- Reports & Analytics
